## Interesting Stuff

### SAFETY ADVICE

Please take note of the following when riding alone:

1. You are not as visible as when in a small pack!
2. On approaching intersections maintain awareness for:
  - a. Vendors between the lanes
  - b. People alighting from taxis
  - c. Faulty traffic lights
  - d. Trucks obscuring pedestrians
3. Vehicle mirrors at the same height as your handle bars or mirrors will decrease your access width between the vehicles on the bike highway (Gap between the vehicles).
4. On a highway with more than two lanes stay alert for other motorbikes in the other bike highway could result in cars encroaching on your highway moving over for them first.
5. The right thing to do is to acknowledge (thank the drivers!) where vehicles have made way for you.
6. Where it is raining or early morning with dew on the road maintain caution on the wet road markings. Will result in loss of traction.
7. With stationary vehicles where you have now moved to the front, some drivers will try and race you for the pull of , some will encroach into the gap on pull off – behave in a safe manner at all times!
8. Stay alert for drivers talking on cell phones, mothers with kids in the vehicle, couples having a disagreement, Learner Drivers (L sign ), ‘old merc’ drivers and of course drivers jumping robots!
9. At traffic circles rather let the vehicles go first at least they are then out of your way (within reason of course).
10. Where you are passing stationary vehicles that are parked on the side of the road – stay alert - might pull off, open a door etc

I called your house the other day...

and was told you were down at your favourite biker bar with some friends...

I wasn't sure where that was...

but was told I wouldn't have much trouble finding it...

Sure enough, I drove just a couple blocks....

And there it was...

There is nothing like the feel of the Sun on your face and the wind in your hair.....!!!

**Feel it.... It's FINALLY here!!! Have a fantastic week...**
